

Authorized Retreads

Precure

G177™ MOD

Mixed Service Drive Applications

- Goodyear exclusive tread rubber compounds equal equivalent new tire tread life per 32" performance
- Tread Design equals new tire traction and cut resistance
- 8-sided "Z" shaped tread lug – mud, snow or "slushy" traction
- "Z" lugs overlap each other for smoother highway ride
- Open shoulder allows tread face to be cleaned of debris
- Separate shoulder elements provide water clearing channels
- Sipes in lug elements provide lateral and circumferential traction
- 27/32" standard tread depth, with 18/32" and 32/32" tread depths for super single or heavy tire applications
- Cut, chip and flaking resistance in on and off road applications
