The F Series Hub Pilot Aluminum Wheels from FORGITRON

| 360° Appearance

The F 47 and F 56 wheels have a near polished 360° finish on both sides for a machined finish price.

| Strength

8000 lbs@130 psi tells you how well the F Series is made. You can count on FORGITRON.

| 7-Year Warranty

During SAE Fatigue testing, the F Series wheels consistently meet the industry Gold Standard. They just run longer.

| Light Weight

The F Series gives you all the advantages of light weight aluminum wheels, 40% lighter than steel wheels and 15% lighter than imported aluminum wheels.

| Forged in Camden, South Carolina, USA

The world's best aluminum wheels have been made in the states for over 40 years. The F Series and Forgitron continue this great legacy in Camden, SC, utilizing the most advanced forging and heat treating processes in the world.

| Affordable

Aluminum to steel wheel acquisition cost has historically been 3 to 1. The F Series reduces that to 2 to 1. Plus, you get a great looking wheel that is stronger than steel.

| Aftermarket Sensibility

360° finish offers smaller stocking requirements. The F Series serves more than 85% of the market.
